

Joe Mullins and The Radio Ramblers

2023 Technical Specifications

Band FOH Audio Engineer: Elijah Doty 217-240-8447 dotysound@gmail.com

Artist Management Contact: Laura Mainer 423-202-8346 laura@mainmanage.com

Artist Equipment: Artist will provide all mics, stands cables, IEM, and backline Equipment.

FOH System: The Venue will provide a professional grade, full-range P.A. system capable of covering the entire concert area.

The artist will provide a 9 Ch. 10 FT sub-snake out of the IEM console. The sub-snake will connect to a stage box with the capacity to receive at least 12 channels transmitting to a FOH audio console.

Power Requirements: Artist Requires two 15A-120V AC outlets, Side stage for IEM rack, and Upstage center for the Bass Amp.

Staging: Shall be provided by the presenter and shall be flat, sturdy, and level. Artist available stage space shall be no less than 10' deep x 20' wide.

Lighting: Shall be provided by the presenter (a general White wash for the entire stage is fine, please keep all distracting lighting effects to a minimum during performance)

Additional Notes: Artist will be responsible for setup and teardown of all JMRR equipment used during performance. Prior to artist's setup, all microphones, stands, and cables shall be removed from the stage. Any additional equipment remaining on the stage that impedes JMRR setup, teardown, or performance shall be removed by artist request.

Please do not hesitate to contact us with any Questions!
